	Example
but can be useful to hide and	`1` `<!-- This is a comment -->`

at document type to expect. Note

```
1  <!DOCTYPE html>
2  <html>
3      <head>
4        <!-- Metadata Here -->
5      </head>
6      <body>
7          <!-- Document Body Here -->
8      </body>
9  </html>
```

n place of path enter the URL or path

```
1  <a href="https://www.ibm.com">IBM</a>
```

gs besides the <head> element to

```
1  <!DOCTYPE html>
2  <html>
3    <head>
4      <!-- Metadata Here -->
5    </head>
6    <body>
7        <!-- Document Body Here -->
8    </body>
9  </html>
```

that content with CSS.

```
1  <div>
2  This element has no particular semantic meaning but is often used in conjunction with
   CSS for styling purposes.
3  </div>
```

```
1  <h1>Thomas J. Watson</h1>
```
